

ARC based Middleware – Exchange of domain specific information

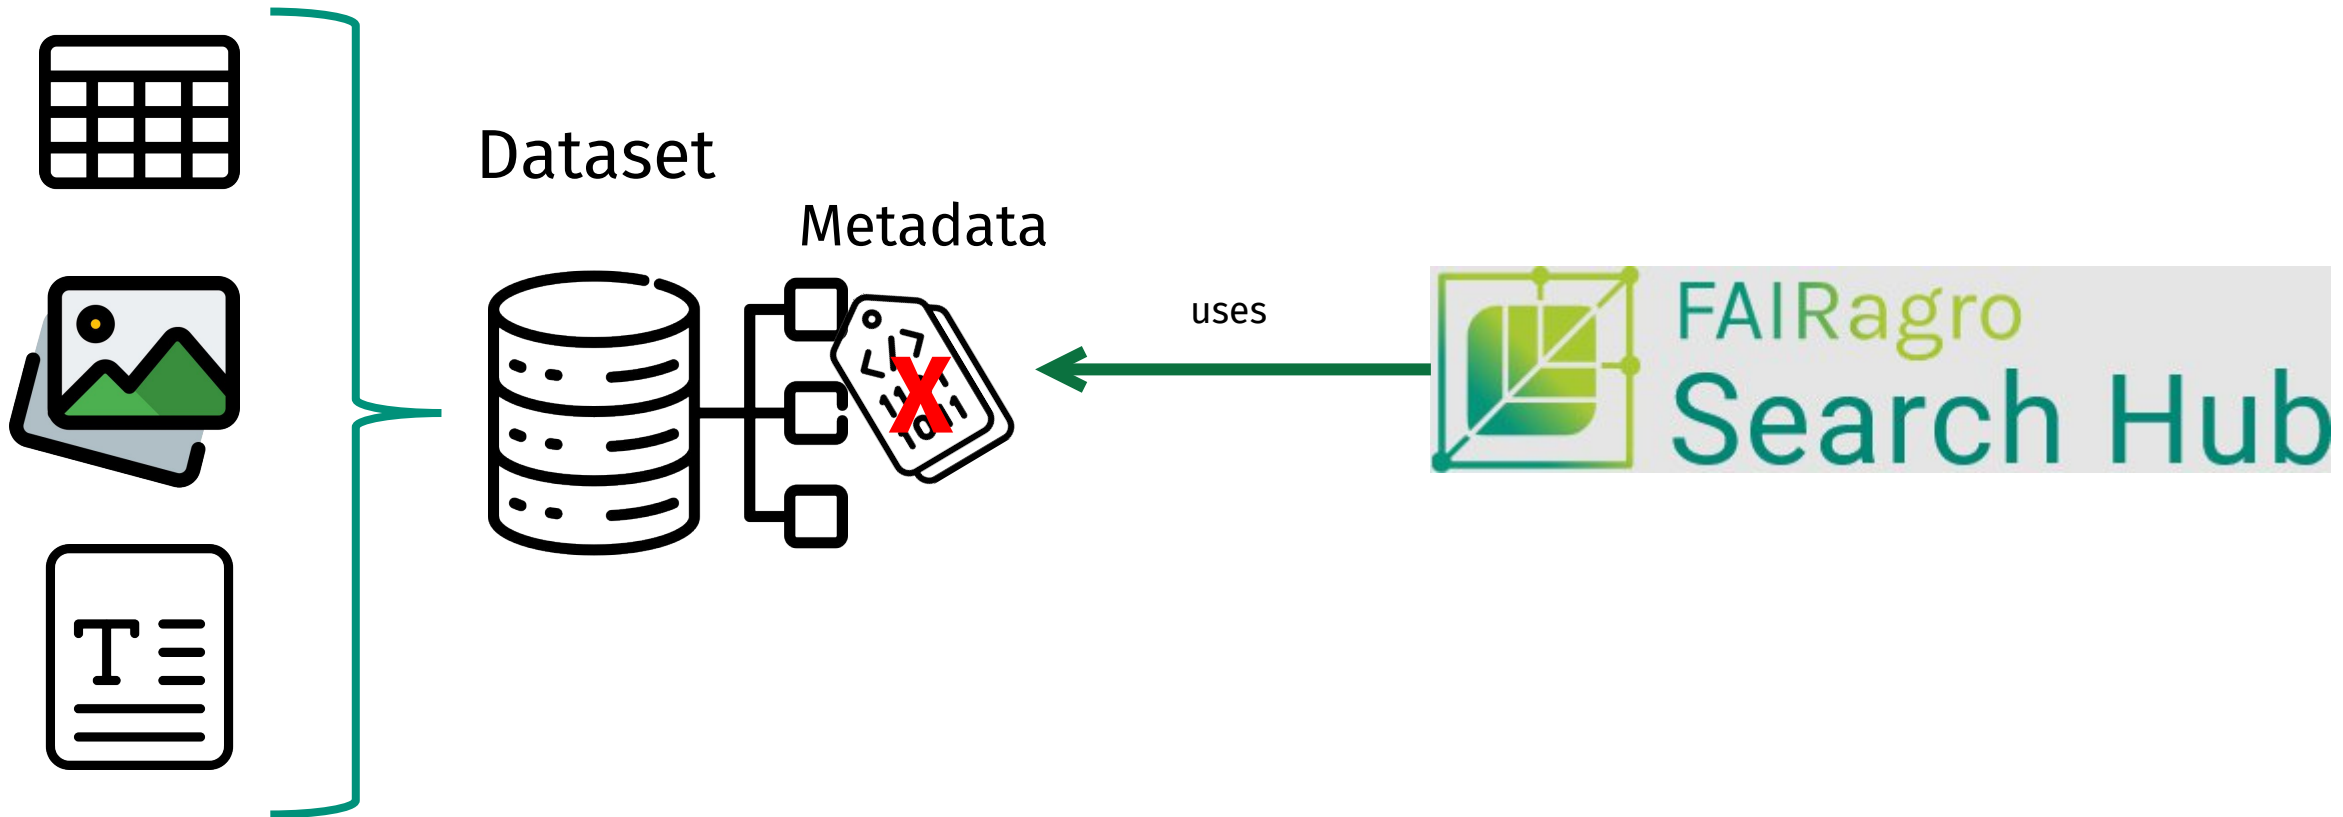

TA3/4 Retreat 2026

Jorge B, Carsten C, Daniel A, Julian S, Gabriel S

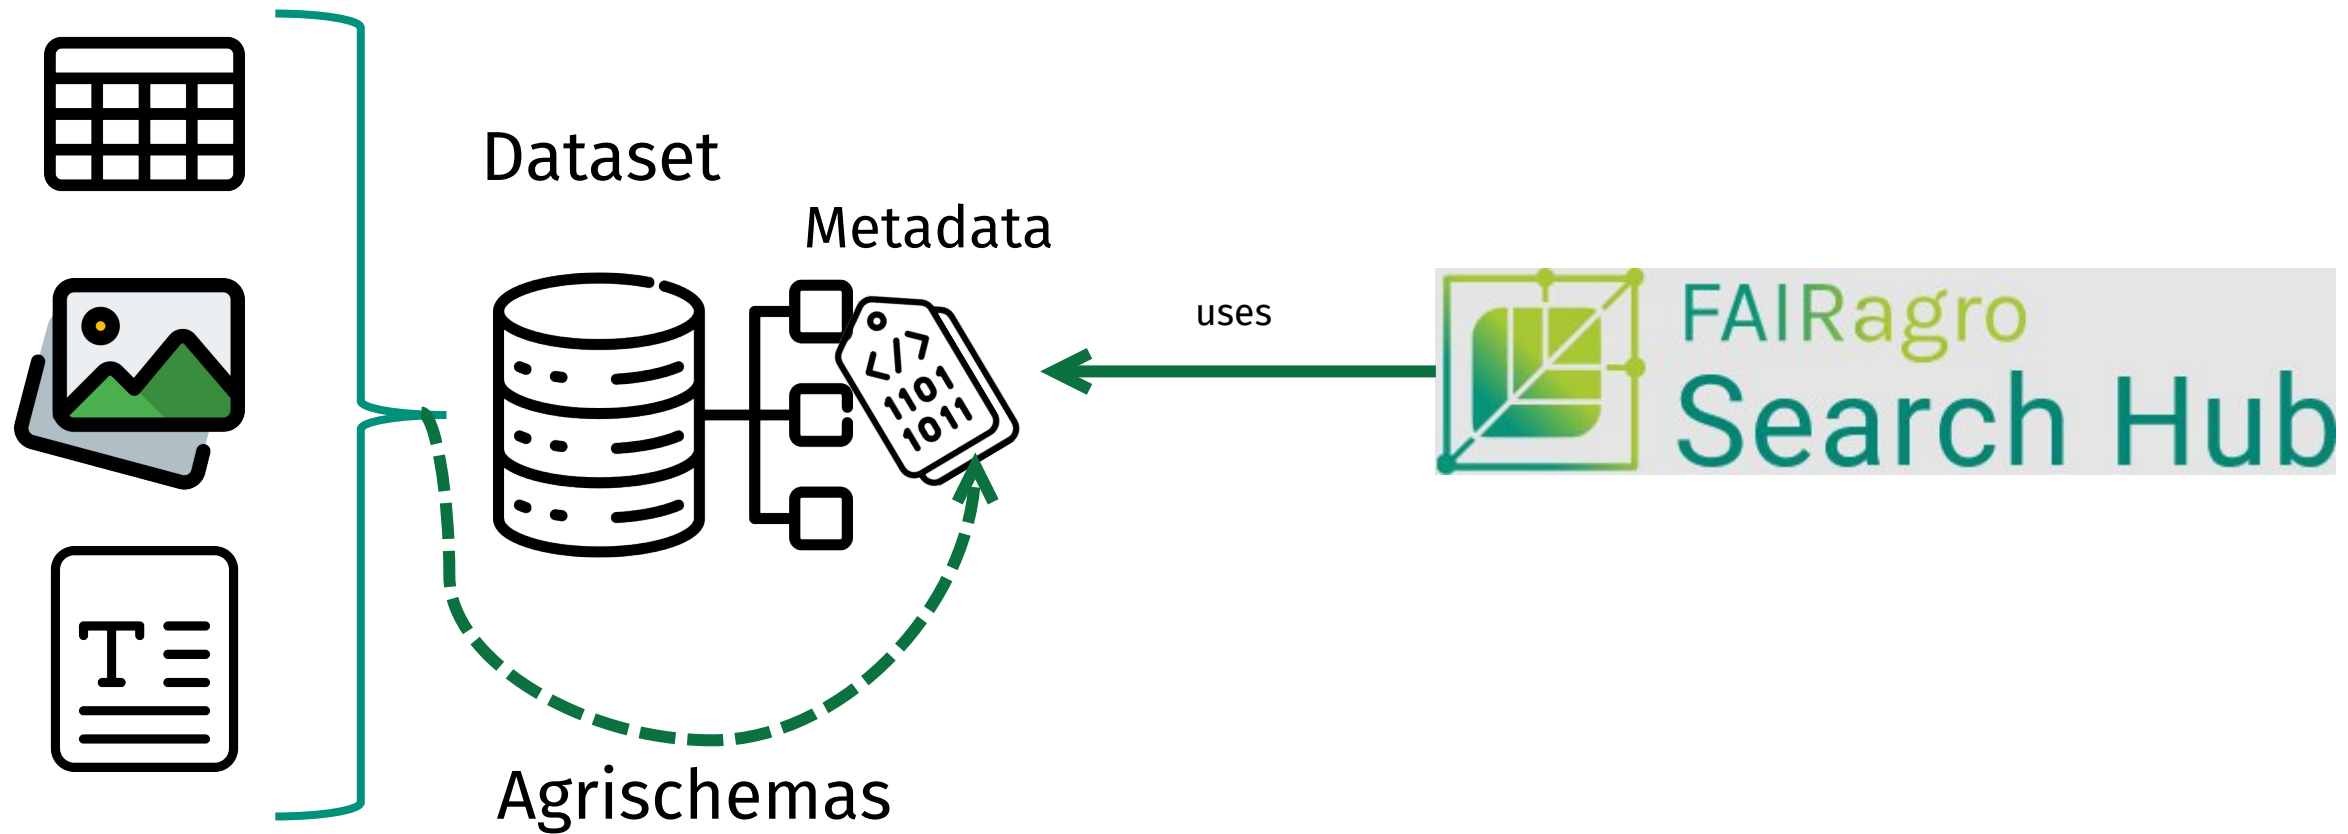

Domain-specific information in FAIRagro RDIs

Using domain-specific information

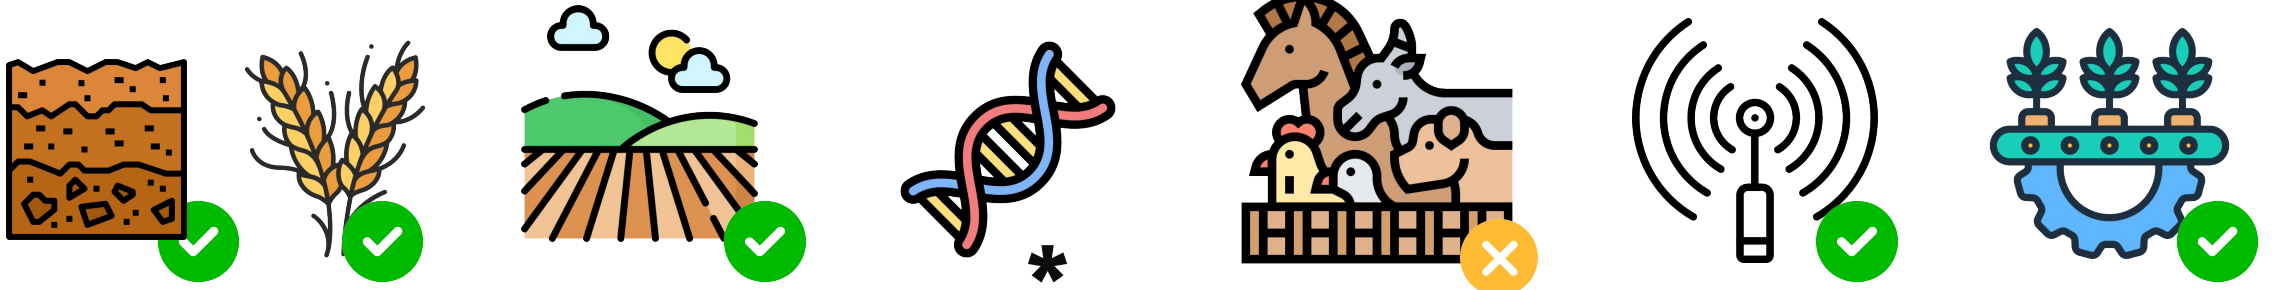

Using domain-specific information

Agrischemas

- Domain-specific information becomes expressible in a Schema.org / Bioschemas conformant way
- Set of classes and properties focused on findability

- Challenge: Handling the variety of ARCs to identify the relevant information and make it available in the FAIRagro Search Hub

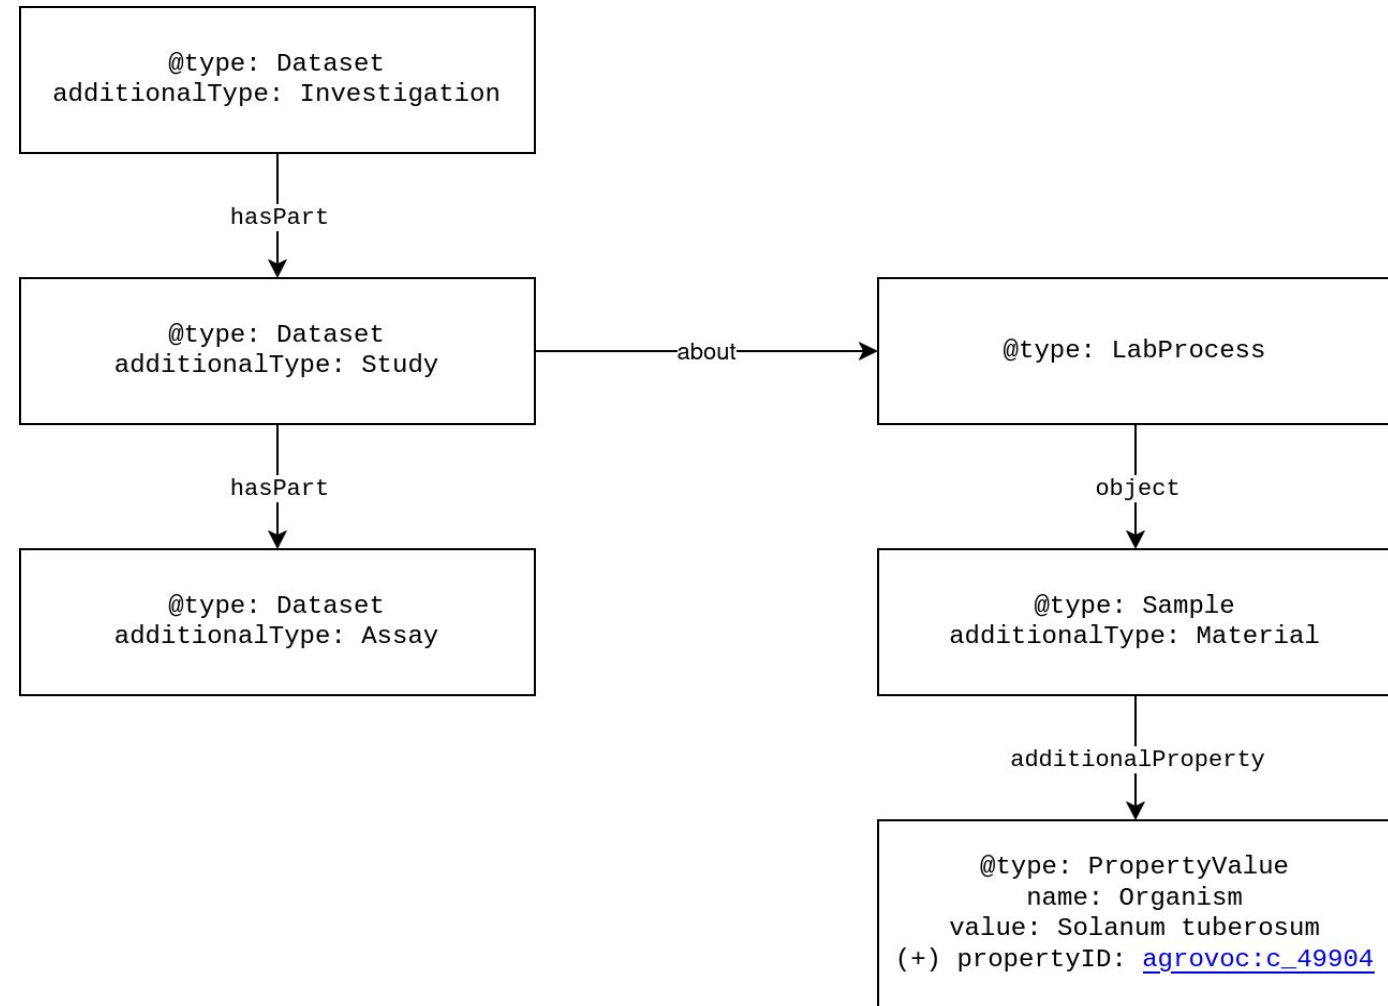

*genotype referencable
via Crop class

Relation between Agrischemas and the ARC

Proposal: Modeling approach

Goal:

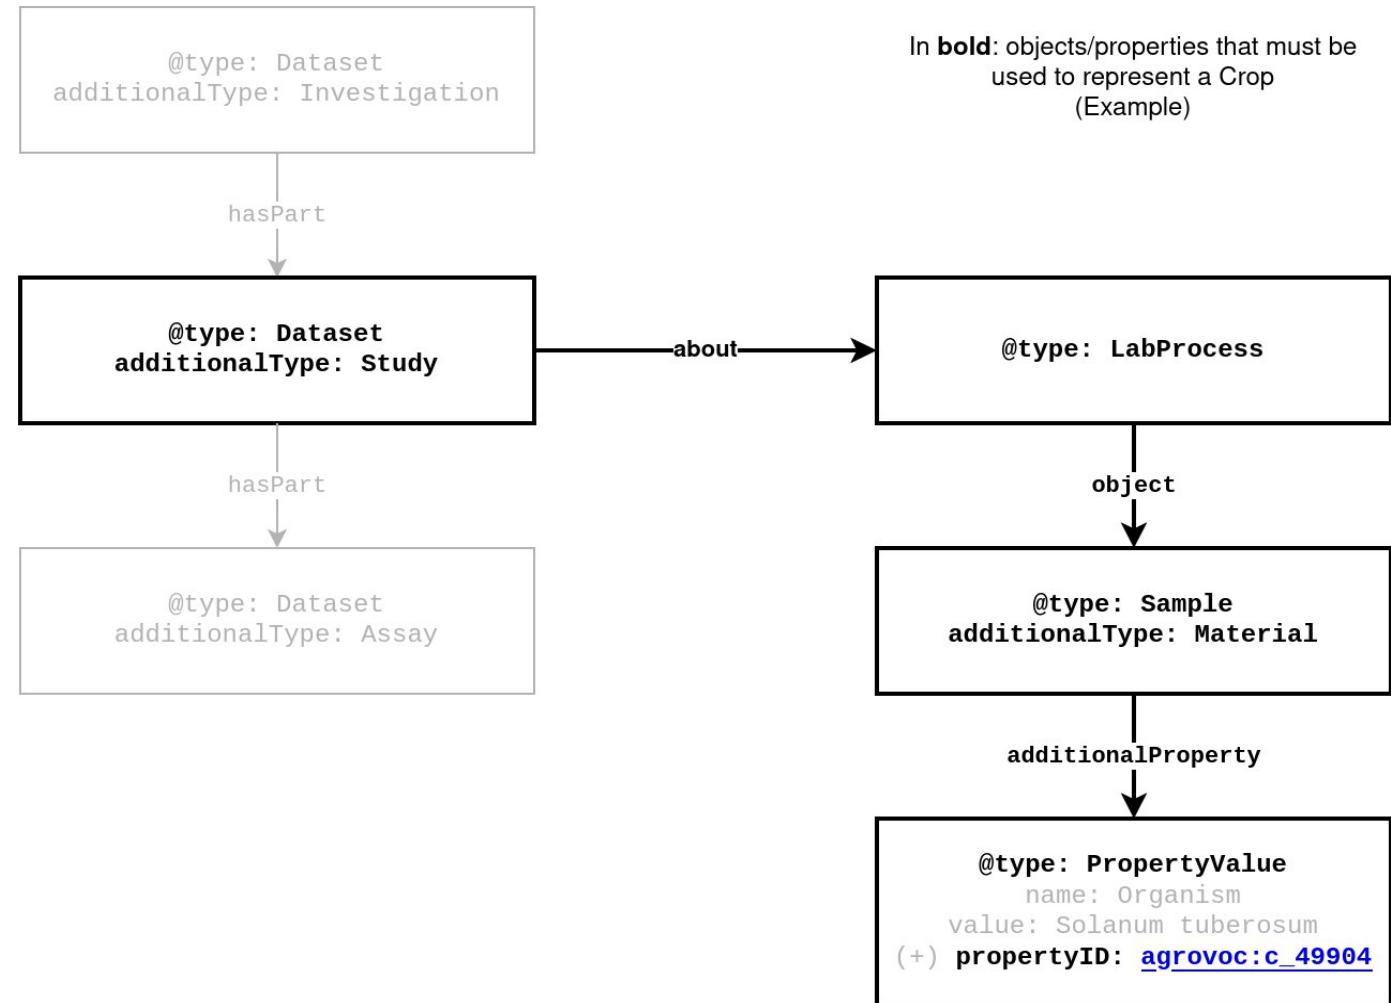

- define how Agrischemas-related objects should be modeled in ARCs
- enable unambiguous transformation

Proposal: Modeling approach

Goal:

- define how Agrischemas-related objects should be modeled in ARCs
- enable unambiguous transformation

Proposal: Modeling approach

How to standardize these rules?

- propertyID: SSSOM mapping?
- parent structure: ?
